

Putnam County Family and Children First Council Shared Plan Update for SFYs 17-19

Current FCFC Initiatives: Service Coordination for children age birth through 21, WrapAround, and the Parent Project. The Council also partners in Putnam County Task Force for Youth, Opiate Task Force, Friends of Mental Health, and the Community Health Improvement Plan.

Were there any modifications from last year's plan? Yes X No

If yes, please identify the types of changes made by checking the appropriate boxes below:

Priorities

X Outcomes- combined three Youth Substance Use outcomes into one, upon the recommendation of regional coordinator at Ohio Family & Children First Council

X Indicators- changed the first indicator under Community Needs Assessment to match other parts of the Shared Plan, upon the recommendation of regional coordinator at Ohio Family & Children First Council

Strategies

1. Identify any barriers in implementing the plan (i.e. data collection, data tracking, funding, infrastructure, etc.)

One huge barrier to data collection occurred with our shared measurements under the Youth Substance Use priority. As a county, we have used the PRIDE survey to youth collect data for over 20 years. Due to financial constraints, we are only able to purchase the survey every other year. Our baseline data was collected in fall of 2015, and our next available data for these measurements will be fall of 2017. So we have no new data to report for this priority.

2. Identify any successes/how implementing this plan has worked to strengthen the council and county collaboration.

Our community needs assessment, which was spearheaded by our Health Department, has been a tremendous success and as a group we were excited that so many of the random mailing surveys were returned. The collaboration that has occurred with the planning group has been wonderful and it was very interesting to watch the county group prioritize the needs that needs to be addressed.

Report on Indicator Data (Provide data for each outcome indicator listed on the Shared Plan. List only ONE outcome per page. This page can be duplicated as needed).

Shared Outcome: Collaborate with Putnam County Health Department and other community agencies to plan and implement county wide community needs assessment

Shared Measurement Indicator(s):	Baseline Data	Current Year Data	Direction of Change (+, -, NC)
Completed community needs assessment for Putnam County	Data: 0 Year of Data: FY17	Data: 1 Year of Data: FY17	+1
Attend meetings for planning/implementation of needs assessment	Data: 0 Year of Data: FY17	Data: ongoing Year of Data: FY17	ongoing
Identify service gaps and needs of Putnam County	Data: 0 Year of Data: FY17	Data: 1 Year of Data: FY17	+1

3. List the data source(s) for the indicator(s):

Putnam County Community Health Status Assessment- completed and released to the public in April 2017. A planning meeting was held on May 24th, 2017 where we identified and prioritized our needs. The group chose 4 needs to include in our Community Health Improvement Plan. That’s process will begin soon.

4. Identify any key findings (explanation of data findings; FCFC actions taken in response to key findings, etc.):

It has been many years since Putnam County has had a full community needs assessment. The last assessment completed by the Health Department only included focus groups, and not a random sampling of community members. The FCFC will be collaborating with the Putnam County Health Department in planning and implementing the needs assessment to be mailed in fall of 2016. Questions cover an array of items that hit many of the priorities that were identified by council members during the Shared Plan process. A group met in early July to review “Core” questions and choose the remainder of the question for the survey. An outside company mailed the survey to a random selection of Putnam County residents, and the Health Department met with numerous focus groups, including the FCFC members. The results of the survey were made public at a county meeting in April 2017. A meeting was then held in May to discuss findings and establish priorities. The group chose 4 different priorities to focus on and started a county resource list. Meetings are ongoing and now the FCFC will contribute to the CHIP process that accompanies the needs assessment. The FCFC plans to use the data from the needs assessment to identify gaps in service, and to better identify priorities in the county, as well as priorities for the FCFC.

Report on Indicator Data (Provide data for each outcome indicator listed on the Shared Plan. List only ONE outcome per page. This page can be duplicated as needed).

Shared Outcome: Student alcohol and prescription drug use will decrease, while the age on onset for underage alcohol use will increase.

Shared Measurement Indicator(s):	Baseline Data	Current Year Data	Direction of Change (+, -, NC)
% of youth in grades 6-12 reporting alcohol use in the last 30 days	Data: 17.5% Year of Data: FY16	Data: 0 Year of Data: FY18	No new data
Age of onset for alcohol use	Data: 14.2% Year of Data: FY16	Data: 0 Year of Data: FY18	No new data
% of youth in grades 6-12 who report past 30 day prescription drug abuse	Data: 1.2% Year of Data: FY16	Data: 0 Year of Data: FY18	No new data

5. List the data source(s) for the indicator(s):

We will be using the 2017 PRIDE survey that will be distributed to each county school, as well as 3 parochial schools, in the Fall of 2017.

6. Identify any key findings (explanation of data findings; FCFC actions taken in response to key findings, etc.):

Every two years the FCFC, in collaboration with the Putnam County Task Force for Youth, plans and implements the PRIDE survey in Putnam County Schools. All students in grades 6, 8, 10, and 12 participate in the survey, unless excused by parent. This is a written survey that asks a variety of questions, including, but not limited to; alcohol and drug, mental health, gambling, physical health, etc. The data is then sent to PRIDE to be compiled and results are typically ready in less than two months. Putnam County is below the national PRIDE average for underage drinking; however, when that number is broken down, Putnam County is actually above average in 6th grade and 12th grade. Many prevention programming that was once available in the county has been eliminated due to funding cuts. Out of four agencies providing prevention programming, only one remains. Putnam County also has a very active Task Force for Youth and a newly assembled Opiate Task Force. The council is interested to see how these changes effect underage drinking numbers and prescription drug misuse in the future. Due to the PRIDE survey only being implemented every two years, we have no new data to report at this update. The process has begun for the 2017 PRIDE Survey and we are currently working to secure funding, which is over \$6,000.00
