1. Identify any barriers in implementing the plan (i.e. data collection, data tracking, funding, infrastructure, etc.)

The task force was just developed in late 2016. At this time, the task force is still collecting the data needed to present to the school administration so that presentations can begin in the schools.

2. Identify any successes/how implementing this plan has worked to strengthen the council and county collaboration.

By creating the task force, this has strengthened the council and county collaboration because of this brought community stakeholders together to discuss an area of concern in the county. Data has started to be collected regarding opioid concern in the county and this has started a lot of conversation on what we can do as a task force to get information out to the public and to start education/prevention at an earlier age.

Report on Indicator Data (Provide data for each outcome indicator listed on the Shared Plan. List only ONE outcome per page. This page can be duplicated as needed).

Shared Outcome: Elementary age children will receive education on illegal substances.
